AI is already costing people their jobs

54,836

US job cuts in 2025 were blamed directly on AI, out of 1,206,374 announced cuts

Challenger, Gray & Christmas, 2025 year-end report

71,825

job cuts attributed to AI since 2023, when this reason was first tracked

Challenger, Gray & Christmas

–28%

jobs for data entry clerks in Malaysia by 2030, as surveyed employers expect

WEF Future of Jobs Report 2025, Malaysia profile

Jobs disappearing fastest, 2025–2030 (WEF)

- **Data entry clerks**
- **Accounting and payroll clerks**
- **Cashiers and ticket clerks**
- **Administrative assistants**
- **Bank tellers**
- **Graphic designers**
- **Telemarketers**

In Malaysia 56% of professionals use AI at work, but only 26% were trained (Hays 2025).

We tested the problem: 55 people answered our survey

Google Form, 10 questions, 22–25 October 2026. Chart labels are in Russian; translation on the right.

60% — **University students**
33 people

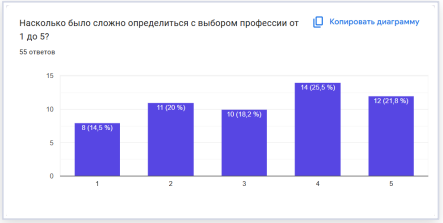

25.5% — **Working after university**
14 people

9.1% — **Finishing school**
5 people

5.5% — **Graduates looking for work**
3 people

Students, school leavers and young professionals: exactly the people choosing a career in the AI era.

For about half of them, every career decision is hard

53%

found choosing a profession hard

36%

found choosing a university hard

51%

found getting an internship or job hard

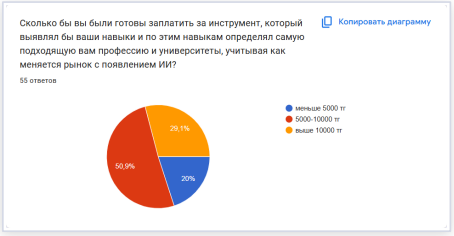

51%

rate their knowledge of AI-era job skills 3 or lower

"Hard" = a rating of 1, 2 or 3, where 1 = very hard and 5 = easy (knowledge question: 1 = don't know, 5 = know well). n = 55. Charts from our Google Form, labels in Russian.

And they are ready to pay for help

A tool that finds the best profession for your skills, given how AI changes the market

20% under 5,000 KZT

50.9% 5,000–10,000 KZT

29.1% over 10,000 KZT

A tool that teaches important AI skills and finds internships and jobs

12.7% under 5,000 KZT

50.9% 5,000–10,000 KZT

36.4% over 10,000 KZT

83.5% **would pay at least 5,000 KZT (about $11) for at least one of the two tools. There is real demand for a platform that does both: Path.AI.**

50.9% people are ready to pay about $11-$20, while 32.75% approved to pay at least $20

n = 55, mostly young people in Kazakhstan; 447.94 KZT per US$ (National Bank of Kazakhstan, 23 Oct 2026). Stated willingness, to be confirmed with pre-orders.

Path.AI: from your skills to a future job in minutes

1. Your profile

Upload a CV or answer 3 questions

2. Live trends

Which skills AI makes rise or fall, with source and date

3. Best roles

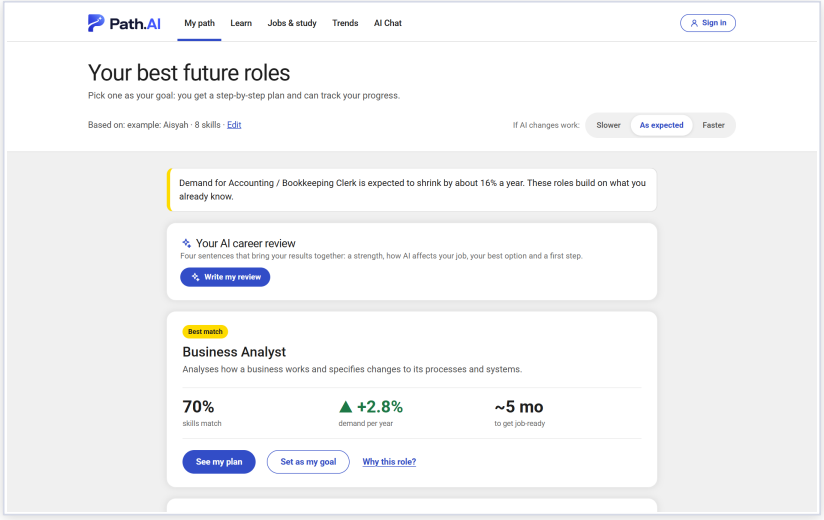

43 future jobs ranked, with a score you can check

4. Your plan

Ordered steps, hours and weeks, free courses

5. Jobs

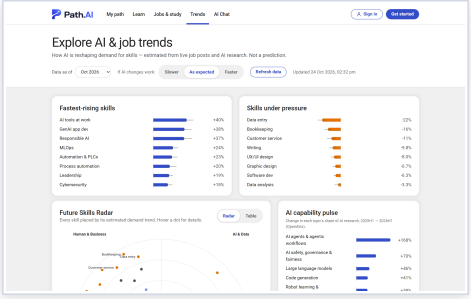

Real postings matched to you, or universities

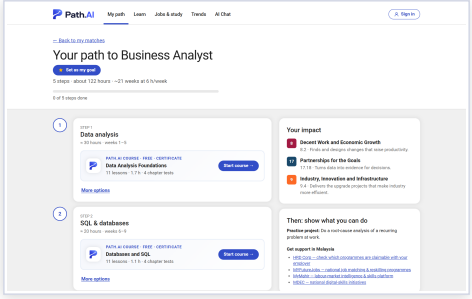

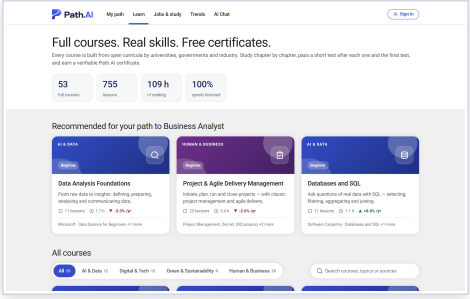

Example: Aisyah, an accounts clerk → Business Analyst, 70% skills match, a 122-hour plan

63 professions · 53 free courses · English, Malay and Chinese

Every recommendation is explained, sourced and free to follow

Live data

- 11,582 job posts (Hacker News) and AI research (OpenAlex), each with its date
- Slower, expected or faster AI: switch the scenario, the ranking changes

A score you can check

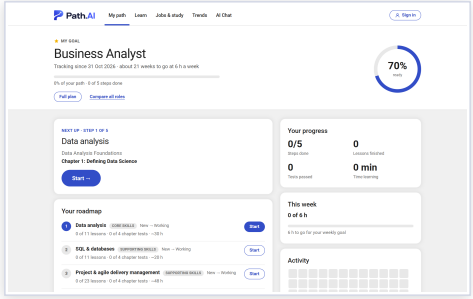

- Overall = 0.5 × skills fit + 0.3 × demand + 0.2 × interests and SDGs
- Shows the missing skills and what would raise the score

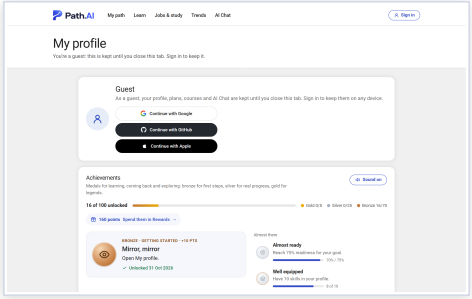

Free, real learning

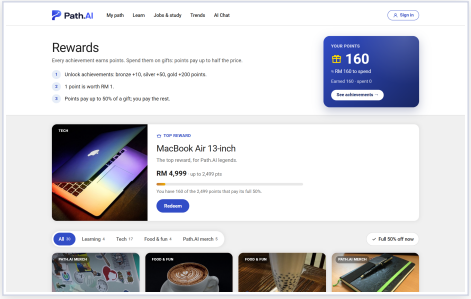

- 53 full courses, 755 lessons, tests and certificates
- Every role and skill is linked to UN SDG targets 4.4, 4.3, 8.5 and 8.2

The AI model (open-weight Qwen3.8-27B) only puts computed facts into words: any number it invents is rejected.

Built to keep people learning until they get there

Goal and daily streak

Set a goal job: readiness %, roadmap, weekly hours and a streak that forgives one missed day

100 achievements

70 bronze, 25 silver and 5 gold medals for lessons, tests, certificates and streaks, with a chime

Points for real gifts

Medals earn points (1 point ≈ RM 1) that pay up to half of 30 gifts, from stickers to a MacBook Air

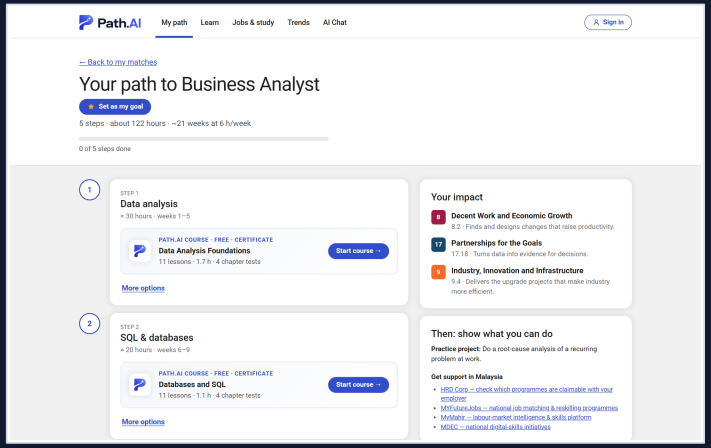

Sign in with Google, GitHub or Apple to keep progress on every device; guests' data never leaves their browser tab.

Let's see it live
